PROFESSIONAL SUMMARY

Results-driven IT Solutions Consultant and AWS Cloud Engineer with 5+ years of hands-on experience designing, deploying, and optimizing high-availability cloud infrastructure and enterprise IT environments. Proven expertise in AWS core services (EC2, S3, IAM, VPC, Multi-AZ RDS, CloudWatch, Route 53), cloud security hardening, and integrating automated Generative AI workflows (Claude AI, LLM prompt engineering). Adept at leading cloud migrations, enforcing zero-trust access controls, establishing automated Disaster Recovery (DR) frameworks, and driving business productivity.

CORE COMPETENCIES & TECHNICAL STACK

• Cloud Infrastructure (AWS):	EC2, S3, IAM, VPC, RDS (Multi-AZ), CloudWatch, Route 53, ALB, Auto Scaling
• AI & Workflow Automation:	Generative AI Integration, Claude AI API Workflows, LLM Prompt Engineering
• Security & Governance:	Identity & Access Management (IAM), AWS KMS, Encryption, CIS Benchmarks, DR/RTO
• Databases & Administration:	Relational Databases (SQL), Microsoft 365 Admin, System Diagnostics & Backup
• Methodologies & Support:	IT Strategy, System Architecture, Tier 1-3 Support, User Training & Technical Docs

FEATURED AWS CLOUD & AI ENGINEERING PROJECTS

⚡ Enterprise AWS Multi-Tier Cloud Infrastructure & Disaster Recovery Architecture

Tech Stack: AWS VPC, EC2 Auto Scaling, ALB, Multi-AZ RDS PostgreSQL, S3 Glacier, IAM, KMS, CloudWatch, Route 53

- Architected a Multi-AZ VPC network with public/private subnet isolation, Elastic Load Balancing, and EC2 Auto Scaling, achieving 99.99% system uptime baseline.
- Configured Amazon RDS PostgreSQL in Multi-AZ mode with sub-minute failover, establishing a Disaster Recovery posture with RTO <15 mins and RPO <5 mins.
- Enforced strict IAM least-privilege policies and AWS KMS customer-managed encryption, achieving 100% pass rate on CIS AWS Security Benchmarks while slashing infrastructure costs by 35%.

⚡ Serverless AI-Powered Intelligent Document Engine (AWS + Claude AI)

Tech Stack: AWS S3 Event Notifications, AWS Lambda (Python), Step Functions, Claude AI API, DynamoDB, RDS, Secrets Manager

- Engineered an event-driven serverless pipeline triggering AWS Lambda on S3 upload to parse and extract structured metadata from thousands of unstructured PDFs.
- Orchestrated complex extraction state machines using AWS Step Functions and optimized Claude AI structured JSON prompts, automating metadata indexing into DynamoDB.
- Secured LLM API credentials via AWS Secrets Manager and automated low-confidence exception routing via Amazon SNS for human-in-the-loop validation.

PROFESSIONAL EXPERIENCE

INDEPENDENT IT & CLOUD CONSULTANT | Cloud & IT Solutions Advisory

Abuja / Remote • 2020 – Present

- Architect and deploy scalable, secure AWS cloud environments for clients, configuring EC2 instances, S3 buckets, and VPC networking to optimize operations.
- Enforce Identity & Access Management (IAM) role-based security policies, ensuring least-privilege controls and safeguarding client data assets.
- Incorporate Generative AI tools (Claude AI workflows, prompt automation) into enterprise operations, accelerating client document processing productivity by 35%.
- Perform automated cloud diagnostics, performance tuning, and database backups (RDS/SQL) to maintain 99.9% system availability across SMB infrastructure.
- Provide ongoing technical support, disaster recovery planning, and network infrastructure management for small-to-medium enterprise clients.

IT SUPPORT & SYSTEMS SPECIALIST | National Assembly, Three Arms Zone

Abuja, Nigeria • 2020 – 2021

- Managed day-to-day IT support operations across departmental systems, maintaining hardware, internal portal accessibility, and network stability.
- Performed comprehensive web and system maintenance including portal speed optimization, database backups, content updates, and link validation.
- Maintained access permissions, technical documentation, and confidential digital archives in full compliance with public sector data privacy standards.
- Prepared executive technical reports, user guides, and digital presentations for leadership to support IT infrastructure decisions.

IT TECHNICAL SUPPORT INTERN | World Wild Fix / University of Ilorin

Kwara, Nigeria • 2016 – 2019

- Delivered Tier-1 and Tier-2 technical support to 200+ active users, resolving desktop, hardware, and network connectivity issues within SLA targets.
- Conducted hands-on user training sessions on newly deployed software applications, digital productivity tools, and cybersecurity best practices.
- Collaborated with senior infrastructure engineers to gather technical requirements and evaluate hardware/software upgrades.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

✓ Applied Generative AI & Claude AI Workflows Training (2026)	✓ AWS / Understanding Cloud Computing Certification
✓ Microsoft 365 Fundamentals Certification	✓ Introduction to Relational Databases in SQL
✓ Project Management Professional (PMP) Training	✓ Healthcare Safety Officer & Environment (HSE 1 & 2)

EDUCATION

Bachelor of Science (B.Sc.) | University of Ilorin, Kwara State, Nigeria
